Challenges and Opportunities 2024 Summarized:

- In Lighthouse, our member database software, on July 9 / 10 we increased from 150 members to 190 members overnight and we had around ten (10) people move out. Further correspondence with HQ ensured nothing was awry.
- We are close to completing a project whereby we will be able to target supporters and former members in our database with tailored communications. David Sapiro of Lib Dems Europe is helping us with this endeavor.
- Renewals and new memberships in the U.S have proven difficult to increase due to the party not accepting cards from the United States.
- As of January 1, 2025, we will be in a position to automate some administrative emails to free up volunteering time.
- An email was created in November 2024, membership@libdemsoverseas.com to create a centralized location to manage membership.
